Using Google Search

Exclude words from your search

Put - in front of a word you want to leave out.

For example, jaguar speed -car

Search for an exact match

Put a word or phrase inside quotes.

For example, "tallest building".

Combine searches

Put "OR" between each search query.

For example, marathon OR race.

Search for a specific site

Put "site:" in front of a site or domain.

For example, site:youtube.com or site:.gov. (no space)

Search for related sites

Put "related:" in front of a web address you already know.

For example, related:time.com.

Referencing

Avoid Wikipedia!

Trello is a tool that helps organise your projects. Trello is one of the most popular applications used by developers for creating web sites. You create a troll board for each project, , create lists to categorise the tasks, colour label these tasks and distribute these tasks to different members of your team. [1]
